...and more!

Government IT for Henrico County, Virginia  
including 911 emergency, police and fire departments

“LogicMonitor has been a **force multiplier** as far as mission operations go. Not only do the system administrators or network administrators have oversight, but for the business units that we’ve delegated monitoring and reporting to, it’s **spread the net** basically.”

– Rosario Gamberdella, IT Manager

**90%**

Reduction in alert noise from  
5,000 alerts/day to 3 or 4

**40+**

Customized DataSources with  
LogicMonitor’s API

**2:1**

Consolidation of monitoring  
tools

# LogicMonitor elevates Topgolf player experience by connecting technology to business insights

## 1 Reduced Complexity

- Consolidated 7 monitoring tools

## 2 Connected to the Business

- Visibility to every bay including availability, utilization and player experience

## 3 Proactive

- Able to deploy resources toward innovation instead of fixing issues

# Schneider Electric consolidates monitoring tools by 83%

1

## 83% tool consolidation

- Scaled down 30 different platforms/tools to 5
- Improved cross team collaboration

2

## 40% alert noise reduction

- Mitigated false alerts

3

## Improved MTTI/MTTR

- Quick anomaly detection with Dynamic Thresholds and AI forecasting

“

LogicMonitor gives us a single pane of glass. Now everyone's looking at the same data, speaking the same language, and collaborating like never before.

**Sanket Lokhande**

Senior Engineer  
Schneider Electric

# Hain Celestial saves over 60% in monthly IT expenditures

1

## Hybrid cloud visibility

- Integrated historical financial data, Amazon CloudWatch data, business metrics, and data from other AWS applications

2

## Cost optimization

- Resulting spend analysis yielded 60% reduction in monthly IT expenditures

3

## Faster MTTR

- LM Logs simplified complex troubleshooting processes, enhancing operational agility

“

One of the biggest things we've been able to do with [LogicMonitor] is share it with others . . . empowering us to hit our to Service Level Agreements (SLAs)”

**Scott LaPaglia**

Senior System  
Administrator
